

Staying healthy in a rapidly changing society

Proposed Approach

MiiCare is a proactive home health care technology company that facilitates personalised healthcare routines and interventions for the elderly. We are focused on keeping older adults safe, healthy and more connected.

Our key focuses across the areas includes fall prevention, condition management, care workforce optimization and cost reduction.

Areas we address

- Extending independence at home
- Condition management and reduction of co-morbidities
- Fall Prevention and Emergency Response
- Freeing up NHS capacity by avoiding hospitalization and re-admissions
- Efficient delivery of care and allocation of GP visits through evidenced prompts
- Management of patient flow and monitoring for GP's

Organisational Capabilities

We have the right background and expertise to solve this problem, with 13+ FTE across tech, medical, and business sectors.

We are also supported by a range of clinical advisors, who support our experienced team in ensuring that our solution is well designed and targeted to the end user.
