

Access to health and care services for people in vulnerable situations

HORIZON-HLTH-2024-CARE-04-04-two-stage

Proposed Approach

Problem: Access to health services for underserved communities.

We want to address: Certain groups are more at risk of not accessing all the health and care services they need, depending among other factors, on their socio-economic and legal status, age, sex and gender identity, (dis)ability, ethnicity and geographical location.

We are looking for partners with experience in medical services and research.

Experience

Octodoc is a Start-Up founded by a team with more than 20 years of experience in Healthcare Operations, Pharmaceuticals Market Access, Medical Hardware and Software Architecture and Development, Patient Experience, Public Policies.

Include your ability to attract the 'Big Names' in the sector (e.g. leading academics, major thought leaders)

We have already developed partnerships with key stakeholders in the area of health services for people in vulnerable situations: patient associations, pharmaceutical industry, hospitals, universities, members of legislative body, government, local authorities.

Organisational Capabilities

Our organisation developed a telemedicine platform specifically designed (both hardware and software) for communities and individuals that are in a vulnerable situation. We have the skill required to further improve and operate it from an operational perspective.

Our organisation is a SME with an agile approach into market driven hardware and software development.

Administrative Information

We are planning on being a Partner.
